

MUHAMMAD UMER

Full-Stack Software Engineer | MERN Stack | Python | .NET

umerm8809@gmail.com | +92 3006425321 | Lahore, Pakistan

github.com/umer250 | linkedin.com/in/muhammad-umer | umer-portfolio-dev.vercel.app

Full-Stack Software Engineer with practical experience building responsive, scalable web applications using React, Node.js, Express.js, MongoDB, PostgreSQL, MySQL, and Python FastAPI. Skilled in developing RESTful APIs, designing database-backed systems, integrating AI models, and connecting frontend, backend, and database components into maintainable applications. Experienced with Git-based collaboration, API integration, role-based access control, responsive UI development, debugging, and application deployment. Strong foundation in object-oriented programming, data structures, algorithms, database management, and software problem-solving.

SKILLS

React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, responsive web design, Node.js, Express.js, Python, Django, Flask, FastAPI, MongoDB, SQL/NoSQL databases, REST APIs, GraphQL, full-stack application architecture, database design and query optimization, unit and integration testing, debugging, Git, GitHub, pull requests, code reviews, AWS/GCP/Azure, CI/CD, API integration, authentication, problem-solving, system design, and software development best practices.

EDUCATION

University of Gujrat (UOG)

Dec 2022 – Aug 2026

BS Computer Science (**CGPA: 3.47**)

EXPERIENCE

App Pillars

Nov 2024 – June 2025

Full-stack web applications using React.js, JavaScript/TypeScript, Node.js, Express.js, Python, and FastAPI, with hands-on experience integrating MongoDB and SQL databases. Skilled in building and consuming REST APIs, implementing responsive and user-friendly interfaces, designing efficient database schemas, optimizing queries, and connecting frontend, backend, and database components into scalable applications. Experienced with Git/GitHub, code reviews, debugging, unit and integration testing, authentication, API integration, and deployment using cloud platforms and CI/CD workflows. Strong problem-solving abilities with a focus on writing clean, maintainable, secure, and production ready code while working effectively in collaborative development environments.

PROJECTS

- **Enterprise Project Management Platform:**

Developed a full-stack project management application using React.js, Node.js, Express.js, MongoDB, JWT, and Tailwind CSS, featuring role-based authentication, project and task management, Kanban boards, file uploads, notifications, and analytics dashboards.

- **AI-Powered E-Commerce Marketplace:**

Built a scalable e-commerce platform using React.js, Python/FastAPI, MongoDB, and Stripe API, including product management, secure payments, order tracking, inventory management, and AI-powered product recommendations.

- **Smart Healthcare Appointment System:**

Developed a responsive healthcare platform using React.js, Django, PostgreSQL, and JWT, providing appointment scheduling, user authentication, REST APIs, patient and doctor dashboards, and automated reminders.

- **Real-Time Collaboration Workspace:**

Created a real-time communication platform using React.js, Node.js, Express.js, MongoDB, and Socket.io, featuring instant messaging, group channels, file sharing, online presence, typing indicators, search, and secure team management.
