Full Stack Developer

SUMMARY

Full-stack software engineer experienced in building web, desktop, and data driven applications with React, TypeScript, Python, FastAPI, Bun/Node.js, and PostgreSQL. Skilled in database design, REST/RPC APIs, Drizzle ORM, and Tauri, with a strong foundation in OOP, DSA, state management, and modern software engineering practices and production ready development.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, TypeScript, C++, Java, HTML/CSS

Frontend: React, Tauri, TanStack Suite, Zustand, Tailwind CSS, shadcn/ui, Radix UI, Bootstrap, HTML/CSS

Backend: Bun, Elysia.js, FastAPI, Node.js, Express.js, Django, RESTful APIs, Eden RPC

Databases: PostgreSQL, MongoDB, MySQL, Supabase, Drizzle ORM

AI/ML: PyTorch, Pandas, OpenCV, NLP basics

Development Tools: Git, GitHub, VS Code, Visual Studio, Docker

Concepts: OOP, DSA, RESTful APIs, ACID Transactions, Agile Basics, SQL Optimization

Currently Learning: ElysiaJS, Rust, Redis, Cloud Deployment

PROJECTS

Dastaan POS – Desktop Restaurant Management & POS System *Company Project*

- Built a fast, offline-capable desktop POS using React, TypeScript, and Tauri, with a local PostgreSQL database.
- Developed a high-speed backend with Bun and Elysia.js, using TanStack Query and Zustand for smooth, responsive checkout workflows.
- Set up a Debian-based local server to connect multiple POS terminals, kitchen displays, and receipt printers over a local network.
- Implemented a subscription and licensing system that automatically restricts access when software rental payments are overdue.
- **Link:** <https://github.com/umer250/Dastaan-POS>

2D Image Anomaly Detection – Industrial Quality Inspection System *Final Year Project*

- Built an unsupervised anomaly detection system using PyTorch and PatchCore, achieving 98.5% AUROC across 15 MVTec AD categories.
- Developed a FastAPI and PostgreSQL backend with SQLAlchemy, supporting fast inference and automated database migrations.
- Created defect heatmaps using OpenCV, SciPy, and Gaussian filtering for detailed industrial defect localization.
- **Link:** <https://github.com/umer250/2d-image-anomaly-detection>

Zeebaish POS – Desktop Retail & Apparel Management POS System *Personal Project*

- Built an offline-first desktop POS using React, TypeScript, and Tauri, with a Bun and Elysia.js backend running as a native sidecar process.
- Implemented direct hardware printing with Rust, supporting ESC/POS thermal receipts and ZPL barcode and garment price-tag printing.
- Built a secure licensing and anti-tamper system with automated trial tracking and feature locking through Windows Task Scheduler.
- **Link:** <https://github.com/umer250/Zeebaish-POS>

EXPERIENCE

Full Stack Developer

Jan 2026 – Present

9T Solutions, Gujranwala, Pakistan

- Built websites, Developed management systems for small retail businesses.
- Managed projects from requirements to deployment and support, designed databases & backend systems.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2022 – 2026

University of Gujrat (UOG), Gujrat, Pakistan | CGPA: 3.47 / 4.0
